Marquette Chalet

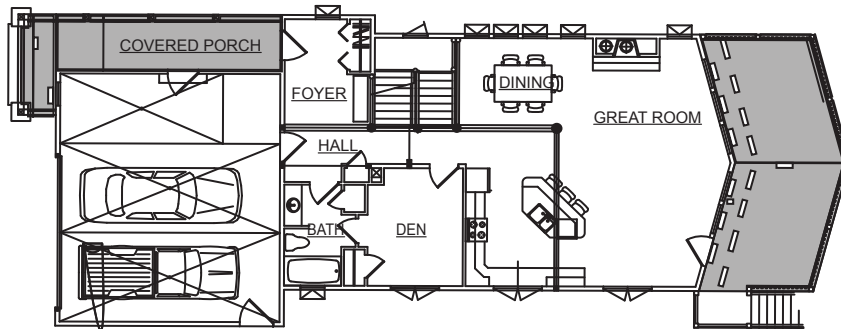

CHARMED. The Marquette Chalet design provides the homeowner with charming gathering spaces and is perfect for either vacation or year-round living. The design utilizes a smaller, more affordable footprint - but with lots of room to roam! With a covered entry and expansive deck, your views are unobstructed. Snow loads are managed with a steep pitched roof, while inside your fieldstone fireplace warms you and your guests in the great room and lower level recreation room. A convenient kitchen snackbar offers space for conversation while the cook entertains her guests. Additional bonus space is found in the lower level and second level for hobbies, tools, or workout rooms! Walk outdoors from multiple levels of this beautiful, mountainside chalet design.

Marquette Chalet

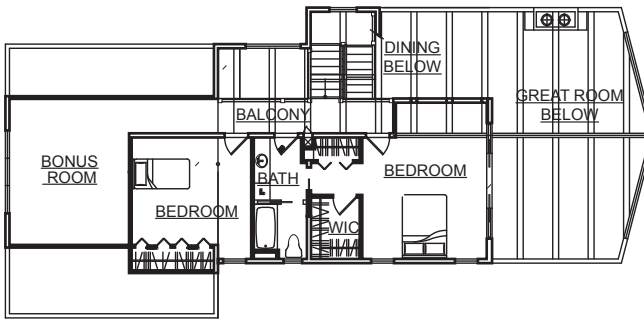

Total: 3,516 Square Feet
3 Bedrooms plus Den, 3 Full Baths
Snack Bar plus Formal Dining,
Recreation Room
